

Solid surface

ENCIMERAS

Libertad en diseños para baños
innovadores y sin limites

CARACTERÍSTICAS DEL SOLID SURFACE:

El Solid Surface representa la elegancia, la personalidad y la creatividad al estar compuesto por materiales que nos dan la posibilidad de cualquier estilo en el diseño; es por ello que fabricamos encimeras de baño a medida totalmente personalizables. La tecnología aplicada en su composición permite una buena limpieza y su resistencia a las manchas o arañazos hacen del solid surface una referencia en innovación para las nuevas encimeras de baño.

Sus características principales son: Resistencia, fiabilidad, buena limpieza y su gran adaptabilidad a formas y diseños, todo ello con la calidez de su tacto.

ES UN MATERIAL HIGIENICO

Las superficies de Solid Surface son resistentes a bacterias y hongos; fácil de limpiar, reduciendo así el riesgo de infecciones y transmisión de enfermedades.

Se trata de un material sin poros y es fabricado con juntas imperceptibles manteniendo una superficie totalmente higiénica.

ES UN MATERIAL REPARABLE

Las encimeras de baño fabricadas en superficies Solid Surface son reparables, lo que significa que pueden ser totalmente restauradas. Pueden ser reparadas "in situ" sin tener que sustituir totalmente el material.

El Solid Surface es un material que al no ser poroso repele todo tipo de manchas y se pueden limpiar fácilmente utilizando jabón y una bayeta aclarando después con agua.

ES UN MATERIAL NO TOXICO

El Solid Surface es un material no tóxico. En condiciones normales de temperatura, no emite gases. Cuando se quema, desprende gas carbónico, el humo que genera es liviano y no contiene gases tóxicos. Es por ello que el Solid Surface se utiliza en espacios públicos como hospitales, mostradores de embarque en aeropuertos y hoteles.

EN RESUMEN

Debido a la versatilidad del material utilizado en nuestras encimeras de baño podemos fabricar lavabos a medida que se adaptarán a sus necesidades y espacio. Fabricamos lavabos encimera totalmente personalizables: Lavabos encimera de dos senos, con faldón, con seno desplazado, con toallero...Etc.
